

## Science and Technology-III (Solution)

### CHAPTER 1 : LIVING AND NON-LIVING THINGS

#### (A) Multiple Choice Questions (MCQ)

Tick (✓) the correct answer :

1. (a)                      2. (c)                      3. (b)                      4. (b)

#### (B) Answer the following questions :

1. Those things which have life are known as living things, e.g. human beings, animals, trees etc. These things can walk, talk, breathe and grow.
2. The things made by man are called man made things. Chair, table, cars etc. are man made things.
3. All living thing breathe because all living things breathe in air. We cannot stay alive without breathing.
4. Non living things are bus, table, book etc.

#### (C) Fill in the blanks with the words given below :

1. water                      2. plant                      3. energy                      4. fly                      5. chick

#### (D) Say whether the following statements are 'True and False' :

1. True                      2. False                      3. True                      4. True                      5. False

#### Sharpen your vocabulary

#### (A) Match the following column :

- |                                      |                                |
|--------------------------------------|--------------------------------|
| 1. A chick - grows into a hen        | 2. A baby - grows into a child |
| 3. A seed - grows into a plant       | 4. A kitten - grows into a cat |
| 5. A little puppy - grows into a dog |                                |

#### Activity

#### (A) Circle the living things :

Do himself

(B) Do himself

(C) Do himself

### CHAPTER 2 : PARTS OF PLANTS

#### (A) Multiple Choice Questions (MCQ)

Tick (✓) the correct answer :

1. (a)                      2. (b)                      3. (c)                      4. (a)

#### (B) Answer the following questions :

1. The two kinds of roots are tap roots and fibrous roots. Tap roots are cotton, mustard and fibrous roots are grass, onion, wheat, rice.
2. Functions of Stem :
  - (a) The stem gives support to the plant.
  - (b) It keeps the plant upright and bears leaves.
  - (c) It bears leaves, buds, flowers and fruits.

(d) It carries food, made by the leaves to the different parts of the plant.

(e) It stores extra food, e.g. potato, sugarcane and ginger.

3. Leaf is called the “Kitchen of the plant” because leaves prepare food for the whole plant with the help of air, water and sunlight.

4. Mustard plant or sunflower plant.

(C) **Fill in the blanks with the words given below :**

1. water                      2. stomata                      3. leaves                      4. seed                      5. ground

(D) **Say whether the following statements are ‘True and False’ :**

1. False                      2. True                      3. False                      4. True                      5. False

**Sharpen your vocabulary**

(A) **Match the following :**

1. Pea - seed                      2. Mint - leaf                      3. Apple - fruit  
4. Sugarcane - stem                      5. Carrot - root

**Activity**

(A) **Label the following :**

Flower, Stem, Leaf, Root

(B) Do himself.

### CHAPTER 3 : PLANTS AND ANIMALS DIFFER

(A) **Multiple Choice Questions (MCQ)**

Tick (✓) the correct answer :

1. (b)                      2. (b)                      3. (b)

(B) **Answer the following questions :**

1. Plants make their own food with the help of air, water and sunlight.

2. (i) Plants and animals both are living beings.

(ii) Animal breathe with the help of nose and plants breathe with the help of leaf pores.

(iii) Animals can move from one place to another but a plant cannot move.

3. Non-green plants make their own food from dead and decaying matter in the soil.

(C) **Fill in the blanks with the words given below :**

1. move                      2. eggs                      3. food                      4. seed

(D) **Say whether the following statements are ‘True and False’ :**

1. True                      2. True                      3. False                      4. True

**Sharpen your vocabulary**

(A) **Match the following :**

1. Eyes - part of an animal body  
2. Flower - part of a plant  
3. A lion - eats other animals  
4. An elephant - love to eat sugarcane  
5. Green plants - make their own food

**Activity**

(A) **Find the following eight animals name. One is done for you :**

1. Lion                      2. Cow                      3. Horse                      4. Monkey                      5. Tiger  
6. Zebra                      7. Hen                      8. Rat

(B) Do himself

## CHAPTER 4 : FOOD AND FEEDING HABITS OF ANIMALS

### (A) Multiple Choice Questions (MCQ)

Tick (✓) the correct answer :

1. (b)                      2. (a)                      3. (a)                      4. (b)

### (B) Answer the following questions :

1. Animals need food for alive, growth and stay healthy. Food also give them energy.
2. Some animals who eats only grass and green plants are called herbivores.
3. Some animal who eat flesh of other animals are called carnivores.
4. Snakes and frogs, swallow their food as a whole. They just shoot out their tongue. They can open their mouth very wide.

### (C) Fill in the blanks with the words given below :

1. Butterflies      2. flesh      3. blood      4. scavengers      5. horse

### (D) Say whether the following statements are 'True and False' :

1. True                      2. False                      3. True                      4. False                      5. True

### Sharpen your vocabulary

#### (A) Match the following :

1. Cow - eats grass
2. Tiger - eats flesh
3. Snake - swallows
4. Mosquito - sucks blood
5. Honey bee - sucks nectar

#### (B) Name two animals that :

1. Cow, Goat                      2. Tiger, Lion                      3. Dog, Bear

### Activity

#### (A) Write 'H' for herbivores, 'C' for carnivores and 'O' for omnivores in the box provided :

C, C, O, H, H, C, O, O

#### (B) Do himself

## CHAPTER 5 : BIRDS : BEAKS, CLAWS, FEATHER AND NEST

### (A) Multiple Choice Questions (MCQ)

Tick (✓) the correct answer :

1. (b)                      2. (a)                      3. (b)                      4. (a)

### (B) Answer the following questions :

1. Grain eating birds have short, hard and horny beaks. They use their beak to crack grains and seed.
2. Ducks have three toes in front and one toe at the back. They have webbed toes and help the bird to push water efficiently while swimming.
3. Birds build nests to protect themselves and their young ones. A bird makes nest when, it is ready to lay eggs.
4. Flight feathers are sturdy and long feathers are usually found on the wings and the tail. These feathers help the bird in flying.

### (C) Fill in the blanks with the words given below :

1. teeth                      2. hooked                      3. penguin                      4. upstrokes

(D) Say whether the following statements are 'True and False' :

1. False      2. True      3. True      4. True      5. False

**Sharpen your vocabulary**

(A) Match the following :

**Activity**

(A) Draw or paste a picture of a nest of weaver bird :

Do himself.

(B) Do himself

### FORMATIVE ASSESSMENT-1

(A) Multiple Choice Questions (MCQ)

Tick (✓) the correct answer :

1. (b)      2. (b)      3. (c)      4. (b)

(B) Answer the following questions :

1. All living thing breathe because all living things breathe in air. We cannot stay alive without breathing.
2. Ducks have three toes in front and one toe at the back. They have webbed toes and help the bird to push water efficiently while swimming.
3. Some animal who eat flesh of other animals are called carnivores.
4. Non-green plants make their own food from dead and decaying matter in the soil.

(C) Fill in the blanks with the words given below :

1. chick      2. seed      3. hooked      4. blood      5. penguin

**Activity**

1. Do himself

### CHAPTER 6 : OUR BODY : A WONDERFUL MACHINE

(A) Multiple Choice Questions (MCQ)

Tick (✓) the correct answer :

1. (c)      2. (a)      3. (c)      4. (b)

(B) Answer the following questions :

1. Sense organs help us to see, hear, smell, taste and feel. Eyes, ears, nose, tongue and skin are five sense organs of our body.
2. The digestive system act in stages to digest our food. Each stage is important and prepares the food from the next stage. firstly it goes into mouth, then goes to stomach, then goes to small intestine, and then undigested food goes to large intestine and goes out with the help of anus.
3. Organ system of our body do not work independently. It work together as members of a team. A number of organs inside our body connected together to do a particular kind of work. These organs form an organs system.
4. The circulatory system is made up of heart, blood vessels and blood. The circulatory system helps in the movement of blood of different parts of the body. The heart works like a pump and pump blood to different parts of the body.

(C) **Fill in the blanks with the words given below :**

1. nose      2. excretion      3. heart      4. skin      5. oxygen

(D) **Say whether the following statements are 'True and False' :**

1. True      2. False      3. True      4. True      5. True

**Sharpen your vocabulary**

(A) **Match the following :**

1. Ear - hearing      2. Nose - Smell      3. Skin - touch  
4. Tongue - taste      5. Eyes - sight

(B) **Write the names of two organs with the following systems :**

1. Brain, Spinal Cord      2. Small Intestine, Large Intestine  
3. Nose, Wind pipe

**Activity**

(A) **Draw sketches of five sense organs :**

Do himself.

(B) **Collect the pictures of different systems of human body from oldbooks and paste them in your scrapbook.**

Do himself.

## CHAPTER 7 : SAFETY HABITS AND FIRST AID

(A) **Multiple Choice Questions (MCQ)**

Tick (✓) the correct answer :

1. (a)      2. (b)      3. (b)      4. (b)

(B) **Answer the following questions :**

1. Accident is a sudden activity which harm us in any manner.
2. Scissors, knives, wet-floors and gas-stoves are some dangerous things found in a house.
3. The first help gives to an injured or a sick person before a doctor arrives is called first aid.
4. (i) Do not get frightened on seeing an accident.  
(ii) Do not let a crowd gather around the person who is hurt.  
(iii) Lay the injured person. Give him/her a little drinking water.  
(iv) Call a doctor or take him to a clinic or hospital.

(C) **Fill in the blanks with the words given below :**

1. accidents      2. zebra      3. blades      4. injured      5. push

(D) **Say whether the following statements are 'True and False' :**

1. True      2. False      3. True      4. False      5. False

**Sharpen your vocabulary**

(A) **Match the following :**

1. Zebra crossing - Black and white stripes      2. Gas stoves - fire  
3. Knife - cut      4. Open wire - Electric shock  
5. Walk - Footpath

**Activity**

(A) **Some of the traffic signs are given below. Find out what they mean :**

- Stop      Traffic Light      Zebra crossing      Cycle  
No Parking      No U-turn      Left turn

- (B) Write the safety rules neatly on a chart and put it on the wall of your classroom.**  
Do himself.
- 

## CHAPTER 8 : OUR HOUSES

**(A) Multiple Choice Questions (MCQ)**

Tick (✓) the correct answer :

1. (a)                      2. (a)                      3. (c)                      4. (c)

**(B) Answer the following questions :**

1. We all need a house to live in. Our house keeps us safe from heat, cold, rain and wind. It also protects us from animals, robbers and thieves.
2. The materials are used to build a house like brick, cement, steel, wood and glasses.
3. We keep our house clean in many manners like :
  - (i) We should clean our house everyday.
  - (ii) We should always keep our things at proper places.
  - (iii) Keep all food items properly covered.
  - (iv) Curtains must be washed regularly.
4. We need proper drainage system in our house so that the dirty water easily carried away.

**(C) Fill in the blanks with the words given below :**

1. clean                      2. plants                      3. regularly                      4. balconies                      5. toilets

**(D) Say whether the following statements are 'True and False' :**

1. True                      2. False                      3. True                      4. False                      5. True

**Sharpen your vocabulary**

**(A) Unscramble the letters to get the correct words related our house :**

1. window                      2. door                      3. bathroom                      4. curtain  
5. houses                      6. kitchen

**(B) Name six materials used to construct houses :**

- (a) Brick                      (b) Cement                      (c) Sand                      (d) Steel  
(e) Wood                      (f) Glass

**Activity**

- (A) Do himself.**
- 

## Formative Assessment-2

**(A) Multiple Choice Questions (MCQ)**

Tick (✓) the correct answer :

1. (c)                      2. (b)                      3. (c)                      4. (b)

**(B) Answer the following questions :**

1. Organ system of our body do not work independently. It work together as members of a team. A number of organs inside our body connected together to do a particular kind of work. These organs form an organ system.
2. The circulatory system is made up of heart, blood vessels and blood. The circulatory system helps in the movement of blood of different parts of the body. The heart works like a pump and pump blood to different parts of the body.
3. The first help given to an injured or a sick person before a doctor arrives is called first aid.

4. We keep our house in many manners like :
- (i) We should clean our house everyday.
  - (ii) We should always keep our things at proper places.
  - (iii) Keep all food items properly covered.
  - (iv) Curtains must be washed regularly.

**(C) Fill in the blanks with the words given below :**

1. skin          2. regularly          3. push          4. accidents          5. toilets

### Activity

- 1. Do himself.
- 1. Do himself.

### Summative Assessment-1

**(A) Multiple Choice Questions (MCQ)**

Tick (✓) the correct answer :

1. (b)          2. (a)          3. (a)          4. (c)          5. (b)

**(B) Answer the following questions :**

- 1. Non living things are bus, table, book etc.
- 2. Plants make their own food with the help of air, water and sunlight.
- 3. Birds build nests to protect themselves and their young ones. A bird makes nest when, it is ready to lay eggs.
- 4. Mustard Plant and Sunflower Plant
- 5. Organ system of our body do not work independently. It work together as members of a team. A number of organs inside our body connected together to do a particular kind of work. These organs form an organ system.
- 6. The materials are used to build a house is brick, cement, steel, wood and glasses.

**(C) Fill in the blanks with the words given below :**

1. seed          2. flesh          3. upstrokes          4. nose          5. clean

**(D) Say whether the following statements are 'True and False' :**

1. False          2. True          3. False          4. True          5. True

**(E) Match the following :**

- 1. A chick - grows into a hen
- 2. A baby - grows into a child
- 3. A seed - grows into a plant
- 4. A kitten - grows into a cat
- 5. A little puppy - grows into a dog

**(F) Name two animals that :**

1. Cow, Goat          2. Tiger, Lion          3. Dog, Bear

**(G) Write the names of two organs with the following systems :**

- 1. Brain, Spinal Cord
- 2. Small Intestine, Large Intestine
- 3. Nose, Windpipe

### Activity

- (H)** Do himself
- (I)** Do himself

## CHAPTER 9 : SOUND AND LIGHT

### (A) Multiple Choice Questions (MCQ)

Tick (✓) the correct answer :

1. (b)                      2. (a)                      3. (c)                      4. (a)

### (B) Answer the following questions :

1. Sound is produced by vibrations. Vibrations are to and fro movement. When air vibrates sound is formed.
2. Non-luminous objects are those objects which do not have their own light and it can be seen only in presence of light. For example-Table, chair.
3. Sounds which are unpleasant in nature are angry, shouting, honking horns and loud banging.
4. A shadow is formed when the path of light is blocked. A shadow is formed on the opposite side of the light. The shape of the shadow depends upon the shape of the object. It can be smaller or bigger than the size of the object. The shade of a tree is actually its shadow.

### (C) Fill in the blanks with the words given below :

1. Communication      2. Vibrations      3. Musical      4. Lunar eclipse  
5. Shadow

### (D) Say whether the following statements are 'True and False' :

1. False                      2. True                      3. False                      4. True                      5. True

### Sharpen your vocabulary

#### (A) Match the correct traffic signal with the correct activity :

1. Music - Pleasant sound.
2. Horn - Unpleasant sound.
3. Torch - Light.
4. Book - Non-luminous object.
5. Shadow - Luminous object

#### Activity

- (A) Do himself.  
(B) Do himself.

## Chapter 10 : Force and Work

### (A) Multiple Choice Questions (MCQ)

Tick (✓) the correct answer :

1. (c)                      2. (b)                      3. (a)                      4. (b)

### (B) Answer the following questions :

1. A push or pull that moves or stops a moving body is called force.
2. Force helps us to move a body, shape of a moving body and change the direction of the moving body.
3. Work done can be calculated by the following formula.  
Work done = Force applied on an object  $\times$  distance moved by the object ( $w = f \times d$ )
4. When we apply force on any object and it moves through a distance, we say that work is done. Force helps us to work.

### (C) Fill in the blanks with the words given below :

1. object                      2. batsman                      3. force                      4. wind

(D) Say whether the following statements are 'True and False' :

1. False                      2. False                      3. False                      4. True                      5. True

(A) Match the following :

1.                       2.                       3.                       4.                       5. 

**Activity**

(A) Cycling, Batsman, Bowling, Riding, Lift.

---

## CHAPTER 11 : MEASUREMENTS

(A) Multiple Choice Questions (MCQ)

Tick (✓) the correct answer :

1. (c)                      2. (a)                      3. (b)                      4. (b)

(B) Answer the following questions :

1. We use different tools to Measure lengths are meter scale, measuring tape and rule.
2. The length is measured by meter scale or rod. It 100 equal divisions called centimeters. Each centimeter has 10 equal divisions called millimeter. The standard unit of length is meter.
3. Weighting machine and spring balance.
4. The standard unit of temperature is °F.

(C) Fill in the blanks with the words given below :

1. kilograms                      2. second                      3. Minutes                      4. Volume                      5. thermometer

(D) Say whether the following statements are 'True and False' :

1. False                      2. False                      3. True                      4. True                      5. True

**Sharpen your vocabulary**

(A) Match the following :

- |                               |                                  |
|-------------------------------|----------------------------------|
| 1. 1 litre - 1000 millilitres | 2. 1 metre - 100 centimetres     |
| 3. 1 gram - 1000 milligrams   | 4. 1 centimetre - 10 millimetres |
| 5. 1 minute - 60 seconds      |                                  |

**Activity**

(A) Draw a clock and colour it also :

Ans. Do himself.

(B) Measure the following object using your centimeter rules.

Do himself

---

## FORMATIVE ASSESSMENT-3

(A) Multiple Choice Questions (MCQ)

Tick (✓) the correct answer :

1. (b)                      2. (b)                      3. (b)                      4. (b)

(B) Answer the following questions :

1. Sound is produced by vibrations. Vibrations are to and fro movement. When air Vibrates sound is formed.
2. A push or pull that moves or stops a moving body is called force.
3. The standard unit of temperature is °F.

4. The environment includes all living and non-living things surrounding us. This includes trees, grass, animals, air, water and other such things.

**(C) Fill in the blanks with the words given below :**

1. musical    2. thermometer    3. batsman    4. force    5. underground

**Activity**

1. Do himself.
- 

**CHAPTER 12 : ENVIRONMENT**

**(A) Multiple Choice Questions (MCQ)**

Tick (✓) the correct answer :

1. (b)                      2. (c)                      3. (c)                      4. (b)

**(B) Answer the following questions :**

1. The environment includes all living and non-living things surrounding us. This includes trees, grass, animals, air, water and other such things.
2. Plants are useful to us because they give woods, vegetables, fruits and medicines to us.
3. Recycling is the process by which we use one thing again and again by this process.
4. In 1972, the United Nations General Assembly decided to dedicate a day to raise environment awareness and to encourage action to protect the environment. It is decided to celebrate 5th June as world environment day.

**(C) Fill in the blanks with the words given below :**

1. Pleasant                      2. garbage                      3. clean  
4. underground                      5. deforestation

**(D) Say whether the following statements are 'True and False' :**

1. False                      2. True                      3. True                      4. False                      5. True

**Sharpen your vocabulary**

**(A) Match the following :**

1. Plants and animals - living things.
2. Waste water - sewage pipes.
3. Mosquitoes - malaria.
4. World environment day - 5th june.
5. Waste paper - recycle.

**(B) Read the following list of instructions and draw a (\*) against those that help in environment clean and healthy :**

- (1) \*                      (3) \*

**Activity**

**(A) Look at the pictures and see what is happening. State whether it is correct or not :**

Incorrect, correct, incorrect, correct.

**(B) Make a chart showing how we keep our surroundings clean and display it in your classroom.**

**Ans.** Do himself.

---

## CHAPTER 13 : SOIL

### (A) Multiple Choice Questions (MCQ)

Tick (✓) the correct answer :

1. (c)                      2. (b)                      3. (a)                      4. (a)

### (B) Answer the following questions :

1. Soil is the uppermost layer of the Earth's surface in which plants grow.
2. Soil is formed over a long period of time by a number of factors. It can take up to 1000 years for just an inch of soil to form.
3. Soil also contains the remains of dead animals and plants. This decayed matter is called humus. Humus makes the soil fertile.
4. The best soil for growth of plants is loamy soil. The Gardeners always mix loamy soil with the other soil to make the soil fertile and better.

### (C) Fill in the blanks with the words given below :

1. soil                      2. fertile                      3. loamy                      4. clayey soil                      5. water

### (D) Say whether the following statements are 'True and False' :

1. True                      2. False                      3. True                      4. False                      5. True

### Sharpen your vocabulary

#### (A) Match the following :

1. Clayey Soil - for making pottery.
2. Sandy Soil - for building houses.
3. Loam - for growing plants.
4. Humus - dead animals and plants.

#### (B) Write two qualities about each :

1. Sandy soil - Building/Houses, Particles are Big
2. Clayey soil - Making Pottery, Healthy nutrients
3. Loamy soil - Growing crops, Air circulation

### Activity

(A) Do himself.

(B) Do himself.

## CHAPTER 14 : WATER

### (A) Multiple Choice Questions (MCQ)

Tick (✓) the correct answer :

1. (c)                      2. (c)                      3. (a)                      4. (c)

### (B) Answer the following questions :

1. The three forms of water is called in solid, liquid and gas.
2. The five activities for which we use water in our life : Bathing, Drinking, Washing the clothes, Cleaning the house and watering the plants.
3. When the water changes into water vapour and goes into the air. The process of changing liquid water into water vapour is called evaporation.
4. The process of changing water vapour into water on cooling is called condensation.

### (C) Fill in the blanks with the words given below :

1. live                      2. water                      3. save                      4. water vapour                      5. steam

### (D) Say whether the following statements are 'True and False' :

1. False                      2. True                      3. True                      4. False                      5. True

## Sharpen your vocabulary

### (A) Cross the odd one :

1. Land                      2. Writing                      3. Ice                      4. Soil

### Activity

- (A) Do himself
- 

## CHAPTER 15 : OUR EARTH AND ITS NEIGHBOURS

### (A) Multiple Choice Questions (MCQ)

Tick (✓) the correct answer :

1. (c)                      2. (a)                      3. (a)                      4. (c)

### (B) Answer the following questions :

1. There are eight planets in our solar system. These are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune.
2. The solar system is the family of the sun, the planets and the moons. The sun is at the centre of the solar system. The earth is a part of the family of eight planets. All these planets go around the sun.

### (C) Fill in the blanks with the words given below :

1. earth                      2. moon                      3. jupiter                      4. metals                      5. constellation

### (D) Say whether the following statements are 'True and False' :

1. True                      2. False                      3. True                      4. True                      5. False

## Sharpen your vocabulary

### (A) Match the following :

- |                                      |                                   |
|--------------------------------------|-----------------------------------|
| 1. Sun - a big star                  | 2. Constellation - group of stars |
| 3. Saturn - planet                   | 4. Pluto - dwarf planet           |
| 5. Moon - closest neighbour in space |                                   |

### Activity

### (A) Which planet is so light that it could float on water if you put it in a big enough tub? Read the hint :

Saturn

- (B) Do himself
- 

## FORMATIVE ASSESSMENT - 4

### (A) Multiple Choice Questions (MCQ)

Tick (✓) the correct answer :

1. (b)                      2. (c)                      3. (a)                      4. (c)

### (B) Answer the following questions :

1. Soil is the uppermost layer of the Earth's surface in which plants grow.

2. There are eight planets in our solar system. These are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune.
3. When the water changes into water vapour and goes into the air. The process of changing liquid water into water vapour is called evaporation.
4. The moon changes its shape every day or after every four weeks from a crescent new moon to a round full moon and then back again, this process of changing shape is called phases of moon.

**(C) Fill in the blanks with the words given below :**

1. fertile                      2. steam                      3. live                      4. metals                      5. water

### Activity

1. Do himself.

## SUMMATIVE ASSESSMENT-2

**(A) Multiple Choice Questions (MCQ)**

Tick (✓) the correct answer :

1. (c)                      2. (b)                      3. (a)                      4. (c)                      5. (a)

**(B) Answer the following questions :**

1. Non-luminous objects are those objects which do not have their own light and it can be seen only in presence of light. For example-Table, chair.
2. Plants are useful to us because plants gives us food, wood, oil, medicines, rubber, fibre, gum, paper and many other such things.
3. The process of changing water vapour into water on cooling is called condensation.
4. Soil also contains the remains of dead animals and plants. This decayed matter is called humus. Humus makes the soil fertile.
5. Some stars occur in groups and form some patterns in the sky. A group of stars that forms a special pattern is called a constellations. Some famous constellations are the Ursa Major, Scorpio, Orion and Leo.
6. Work done can be calculated by the following formula.

Work done = Force applied on an object × distance moved by the object ( $w = f \times d$ )

**(C) Fill in the blanks with the words given below :**

1. constellation                      2. force                      3. line                      4. water vapour                      5. water

**(D) Say whether the following statements are 'True and False' :**

1. False                      2. False                      3. False                      4. True                      5. True

**(E) Match the following column :**

- |                             |                               |
|-----------------------------|-------------------------------|
| 1. Music - Pleasant sound   | 2. Horn - Unpleasant sound    |
| 3. Torch - Light            | 4. Book - Non-Luminous object |
| 5. Shadow - Luminous object |                               |

**(F) Write two qualities about each :**

- |                                      |                                      |
|--------------------------------------|--------------------------------------|
| 1. Building/House, Particles are big | 2. Making pottery, Healthy nutrients |
| 3. Growing crops, Air circulation    |                                      |

**(G) Cross out the one :**

1. Land                      2. Writing                      3. Ice

### Activity

- (G) Do himself
